

Edmodo

Edmodo je vrsta društvene mreže. Cilj mreže je povezati nastavnike/ce u zajednice i olakšati im pristup i dijeljenje materijala i znanja. Omogućava saradnju u manjim grupama (simulacija razreda) između nastavnika/ca i učenika/ca. Takođe omogućava i pristup roditeljima. Edmodo nazivaju "Facebook" za učenje. Povezanost dolazi od trenutka kada se pogleda na naslovnu stranu Edmoda koje je slična početnoj stranici Facebooka, što učenicima/ama olakšava korištenje i prihvatanje Edmoda u nastavi. Princip rada Edmoda: nastavnici/e kreiraju grupe i u njih učlanjuju svoje učenike/ce. Unutar svake je grupe moguće kreirati podgrupe i u njih raspodijeliti članove/ice. U grupama i podgrupama mogu se objavljivati vijesti, obavijesti, kreirati kvizovi, upitnici, dijeliti poveznice, datoteke, multimedejske datoteke, itd. Nastavnik/ca (vlasnik/ca grupe) može slati poruke cijeloj grupi, odabranoj podgrupi ili direktno bilo kojem/kojoj članu/ici svoje grupe, dok učenici/e ne mogu međusobno direktno komunicirati već imaju mogućnost slanja poruke cijeloj grupi. Moguće je također dodijeljivati značke kao nagrade učenicima/ama za njihov trud i zalaganje.

My students are most confused about what is a "conflict" and what is cyberbullying.
